Resolution 2014-11

Resolution Opposing the Construction of a Nuclear Waste Repository in the Great Lakes Basin

WHEREAS, Ontario Power Generation (OPG) is proposing to construct a deep geologic repository (DGR) which is an underground long-term burial facility for all of Ontario's low and intermediate level radioactive nuclear waste at the Bruce Nuclear Generating Station, some of which is highly radioactive and will remain toxic for over 100,000 years. This site is approximately one kilometer inland from the shore of Lake Huron and about 400 metres below the lake level; and

WHEREAS, water is the nation's and Canada's most important natural resource and should be protected and managed prudently; and

WHEREAS, the Great Lakes are an irreplaceable natural resource, containing twenty percent of the world's and ninety-five percent of the United States' fresh water vital to human and environmental health; and

WHEREAS, THE Great Lakes are vital to the economic and agricultural well-being of both Canada and the United States of America; and

WHEREAS, Lake Huron and the connecting waters, including Lake St. Clair, are a source of drinking water for millions of people downstream in the United States of America, Canada and First Nations; and

WHEREAS, concern has been expressed over the proposed OPG DGR by individuals, citizen and environmental groups, and municipalities and counties in both Canada and the United States; and

WHEREAS, under the *2012 Protocol Amending the Agreement Between Canada and the United States of America on Great Lakes Water Quality*, the governments of the United States and Canada acknowledge the importance of anticipating, preventing and responding the threats to the waters of the Great Lakes; and

WHEREAS, The Governments of Canada and of the United States share a responsibility and an obligation to protect the Great Lakes from contamination from various sourced of pollution, including the potential leakage of radioactivity from an underground nuclear waste repository; and

WHEREAS, placing a permanent nuclear waste burial facility so close to the Great Lakes is ill-advised. The potential damage to the Great lakes from any leak or breach of radioactivity far outweighs any suggested economic benefit that might be derived from burying radioactive nuclear waste at this site. The ecology of the Great lakes, valuable beyond measure to the health and economic well-being of the entire region, should not be placed at risk by storing radioactive nuclear waste underground so close to the shoreline; and

WHEREAS, Michigan as significant experience with the concerns for siting a radioactive waste disposal facility as the state went through an exhaustive siting process over twenty years ago and concluded there was viable location for constructing such a facility; and

WHEREAS, the Michigan State Senate has expressed serious concerns for the failure of the siting process in Ontario for the proposed OPGDGR to fully account for all potential impacts of the proposed facility by passing a legislative package urging intervention by the Great lakes Commission, the International Joint Commission and a special legislatively created advisory Board. SB 948, SCR 16, SCR 17, SR 150 and SR 151 all have been passed unanimously by the Michigan Senate.

NOW THEREFORE, BE IT HEREBY RESOLVED, that the Township of Casco, St. Clair County, Michigan, in order to protect the Great Lakes and its tributaries, urges that neither this proposed nuclear waste repository at the Bruce Nuclear Generating Station nor any other underground nuclear waste repository be constructed in the Great Lakes Basin in Canada, the United States, or any First Nation property.

BE IT FURTHER RESOLVED, that the Township of Casco, St. Clair County, Michigan, urges the Government of Canada and the Government of Ontario to reject and seek alternative to Ontario Power Generation's proposal to buy radioactive nuclear waste in the Great Lakes Basin. In addition, pursuant to SCR 16 and SR 151, the Township of Casco, St. Clair County, Michigan also urges President Obama to take all necessary steps to engage the International Joint Commission.

BE IT FURTHER RESOLVED, that copies of this Resolution be provided to Canadian Prime Minister Stephen Harper, Ontario Premier Kathleen Wynne, Canadian Federal Minister of the Environment Leona Aglukkaq, the Great Lakes Commission, the International Joint Commission, Governors and legislative leaders of the eight Great lakes states, Michigan Governor Rick Snyder, U.S. Senators Carlen and Debbie Stabenow, U.S. Representative Candice Miller, Michigan Senator, Phillip Pavlov and Michigan State Representative Andrea LaFontaine, as well as the Joint Review Deep Geological Repository for Low and Intermediate Level Radioactive Waste (case reference #17520) Co-Manager Ms. Debra Myles.

Motion to adopt by D. Goulston

Supported by C. Stover

The adoption of said Resolution being put to a vote of the Township Board was carried by the following:
